

KOBASHI AROMATHERAPY

The Holistic Approach

Essential oil is the true essence of a single plant & is usually extracted by steam distillation. Each plant yields its own unique essential oil: whether herbs, spices, resins, leaves or flowers.

Essential oils have long been used for their healing properties as well as for their fragrant aromas, evoking memories & creating positive memories.

They may be used on many levels: physical, emotional, mental, spiritual & are ideal when used in combination with other therapies or on their own.

Kobashi essential oils are sourced from around the world. They are all the best quality we can find: pure & derived from named botanical species.

We **always** recommend that the oils are **diluted** before application to the body. Lavender may be used neat for specific applications. The oils may be used singularly or in combination, but do not exceed the dilution ratios recommended.

THE OILS MAY BE USED IN THE FOLLOWING WAYS:

BATH

Simply add a total of 2 or less drops essential oil to 5mls of Kobashi **Luxury Bath Base**. Soak for up to 20 minutes allowing the oil to penetrate the skin while enjoying the luxurious vapours. Choose oil to suit your mood:

- * Rosemary, Helichrysum G &/or Spearmint to get you going in the mornings.
- * Ylang Ylang, Lavender, Valerian &/or Cedarwood to relax in the evenings.

MASSAGE

Add a total of 2 drops or less essential oil to every 5mls of Kobashi **Massage Body Oil** or **Moisturising Lotion**. Choose any oil to suit your condition or mood.

- * Chamomile & Lavender to encourage sleep.
- * Ylang Ylang, Sandalwood &/or Jasmine for a sensuous massage.

PERFUME

Essential oils have always been used as perfumes: either singularly or in blends. They can be used simply for pleasure or to reinforce the effect of other aromatherapy applications. Use a total of 1 drop or less to 5mls of **base**.

- * Try blending Grapefruit, Basil, Bergamot & Lavender for a pleasant aroma.
- * Cypress, Frankincense or Vetiver in **moisturiser** for a great shave.

VAPORISATION

Add 4 to 8 drops of essential oil to the bowl of a Kobashi **Burner**. Fill with water & place over night light: ideal for banishing strong smells. For a subtler effect try using a Kobashi **Aroma Ring** or **Aroma Disc**. Particularly helpful in stuffy centrally-heated rooms. Electric Aromastones & Aromastreams are safe to leave on all night.

- * Try Ravintsara, Palmarosa, Cinnamon &/or Thyme to kill airborne bacteria.
- * Lemongrass, Lime, &/or Fennel to clear smoke & create a pleasant atmosphere.

MORE SPECIFICALLY THEY MAY BE APPLIED TO THE BODY IN THE FOLLOWING WAYS:

HAIR

Essential oils are excellent beauty aids which help to condition the scalp which in turn produces healthy hair.

For very dry & damaged hair try Sandalwood, Patchouli &/or Vetiver (add 3 drops or less of oil to 10 ml warm Jojoba or base Body oil, massage into scalp, wrap in a warm towel for 20 minutes & shampoo out). Alternatively, try adding your chosen oil to any Kobashi conditioning shampoo.

- * For greasy hair try Chamomile, Grapefruit, Lemon &/or Orange.
- * As a tonic use Rosemary & Juniperberry &/or Petitgrain.

SKIN/FACE CARE

(Mixing ratio: up to 1 drop or less to every 5 ml base product)

Essential oils encourage the sebaceous glands (the glands just under the skin) to function more efficiently. This improves the general health of the skin. Use with **Kobashi Lotion/cream complex, Aloe Vera Gel or Massage Oils** to create your own individual preparations. These base products have been specially formulated to readily absorb essential oils. Choose the oils to suit your skin type &/or an oil you have a personal preference for. Less can be more with essential oil, start off with a drop, smell it then add another drop if you prefer.

- * Problem or teenage skin try Tea tree, Myrtle &/or Maychang.
- * Dry or mature try Rose, Frankincense.
- * Learn more... see: A2 Kobashi poster, other side of this leaflet & kobashi.co.uk

BABIES & CHILDREN

Essential oils can be very beneficial to babies & children as long as they are used with care. **Always dilute** the essential oil in a Kobashi base before applying to the skin or adding to the bath. For babies use only one drop of oil to 10ml of base: for children use half the amount an adult would use. We have an excellent ready to use Baby Lotion, Bath wash & Massage oil.

- * Try Lavender & Chamomile at night to encourage sleep.
- * Grapefruit & mandarin calms & soothes.
- * Myrtle vaporised to clear airways.

The examples given should only be used as a guide. We like to encourage our customers to experiment. The oils are flexible & can be used in endless combinations. Use the idiom: less is more. They are for you to enjoy.

COMPANY POLICY

GUARANTEED AUTHENTIC NATURAL OILS SINCE 1985

KOBASHI OILS are highest quality, undiluted & derived from named botanical species, tested for chemo-type & Organic if possible. We detest harmful chemicals & would like to see them banned. Oils called "Organic" have been known to contain phlatates, pesticides & herbicides, this is why end product testing is essential.

Great care is taken when purchasing: buying direct from growers & distillers if possible. We grow Organic Lavender, Calendula & St John's Wort in Devon. Import Frankincense & Myrrh gum by the ton & distill in the UK.

The oils are rigorously tested using the latest equipment, GC-MS in conjunction with Wiley, a 360,000 chemical spectra, Robert P. Adams & Kobashi libraries.

All Kobashi products are Vegan, derived from nature, free of synthetic colour, perfume & parabens. We do not test on animals & have a strict policy of non animal tested ingredients.

All Kobashi Products are formulated & blended in-house giving us complete control over the ingredients.

SHELF LIFE & STORAGE

Oils are prone to the effects of light, oxygen, heat & moisture best kept at a moderate temperature. Sensitive oils are purged with nitrogen, increasing life. All products have a once opened jar symbol. **KOBASHI E.O's** come in amber glass bottles with droppers.

As with a good red wine/spirit shelf life is not an exact science. Patchouli & Frankincense improve with age. Citrus, Juniperberry, Pine & Carriers have the shortest shelf life: generally 1- 2 years, but can last longer. Refrigeration can extend, but not cold pressed citrus oils because of wax fallout. Over a period of time oil residue on dropper may oxidise, giving a false impression of aroma. A drop of oil on a testing strip will give a true sense.

Natural oils are prone to variations due to geographic, method of husbandry & distillation. Testing has shown differences on the same farm. If not 100% satisfied with our products, please return to place of purchase, within 30days for full refund. This does not replace your statutory rights. {E.&OE.}

CAUTIONS

✿ use in greater dilutions.

☼ should not be used on skin before exposure to the sun. Does not apply when used in bath, shampoo or soap.

If accidentally swallowed DO NOT induce vomiting: drink at least 1 pint of water: seek urgent medical attention. Show bottle & amount.

We do not recommend any essential oils to be taken internally or applied undiluted to the skin: unless under qualified supervision.

Keep oils out of reach of children!

Avoid contact with the eye area: should this happen, immediately wash eyes thoroughly with water & repeat.

Seek medical attention if stinging persists after 10 minutes.

Some people may have allergic reactions to essential oils. Kobashi can not be held responsible for any adverse reactions from their use.

Many essential oils are Flammable. May stain plastic or polished surfaces.

Used responsibly the oils are a safe natural product, here for you to enjoy & to benefit from.
